APPRAISAL

NOTE: This is to certify that we are engaged in the jewelry business appraising diamonds, jewelry, and precious stones. We herewith certify that we have, on this day, carefully examined the following listed and described articles. In that mountings prohibit full and accurate observation of gem quality and weight, it must be understood that all data pertaining to mounted gems can only be considered as provisional. Additionally, because jewelry appraisal and evaluation is not a pure science but rather a subjective professional viewpoint, estimates of value and quality may vary from one appraiser to another with such variances not necessarily constituting error on the part of the appraiser. Therefore, due to the very subjective nature of appraisal and evaluation, statements and data contained herein

cannot be construed as a guarantee and warranty. We assume no liability with respect to any action which may be taken on the basis of this appraisal or for any error in or omission from this report (except for fraud, willful misconduct or gross negligence). Unless specifically noted otherwise, this report DOES NOT represent an offer to buy and shall be for the exclusive use of the below mentioned client.

We estimate the value listed for insurance or other purposes at the current retail value, excluding Federal and other taxes, unless otherwise noted.

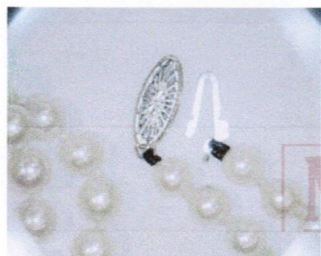

DATE: 3/6/2013

- ☒ Diamonds/gemstones have been clarity and color graded in stone mounting; all stone carat weights are estimated on a formula.
☐ Diamonds/gemstones have been appraised loose.
